

- **SatSalary**

Pay your team without selling a satoshi.

Today, making payroll means selling the Bitcoin you are trying to hold.

Sat Salary fixes that.

— THE PROBLEM

Every payday, treasuries face the same trap.

1,000,000+ BTC

held in corporate treasuries — meant to be held, not spent.

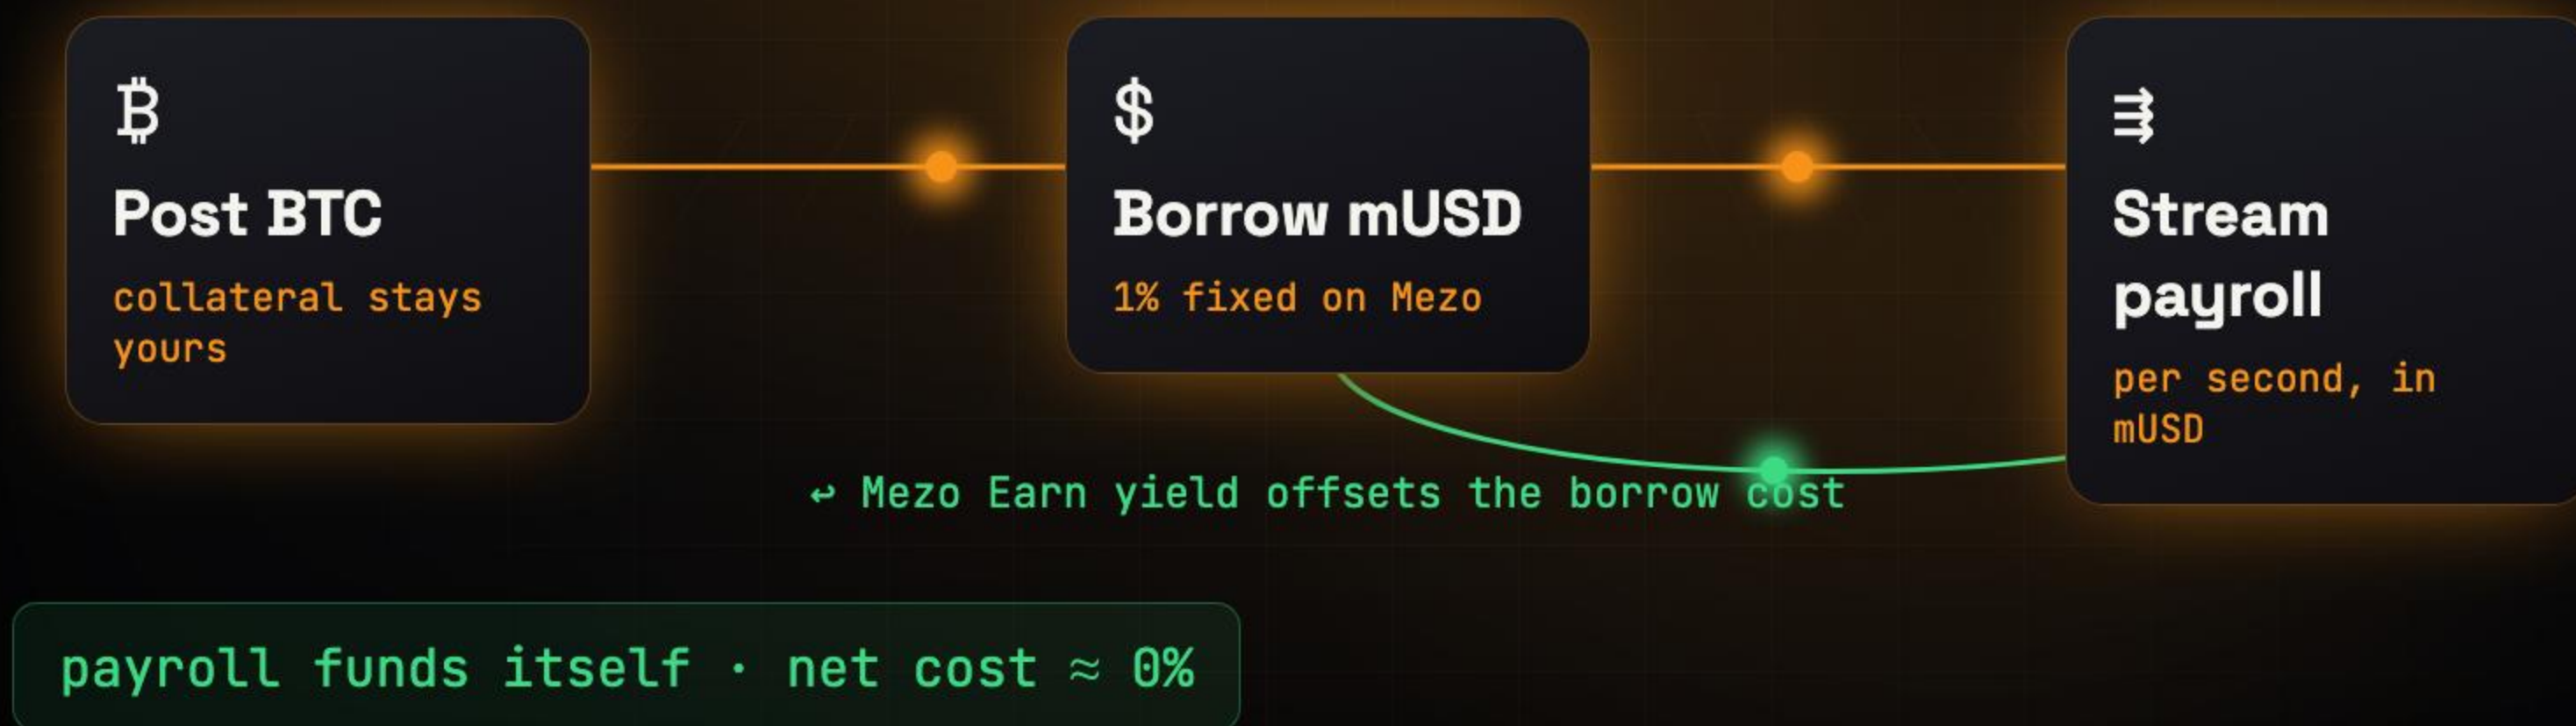

sold to make payroll →

A taxable event. A locked-in price. The upside — gone.

— THE SOLUTION

Sat Salary turns your Bitcoin into a **payroll** engine.

— WHO WE ARE

You bet on the team.

Darth Stormer XII

Web3 & smart contracts

Web3 specialist — has shipped web3 products across multiple hackathons.

Joel Antony Xaviour

Engineering & systems

Associate Tech Lead @ KLA ·
Data Science master's, PSG
Tech · algorithms & systems.

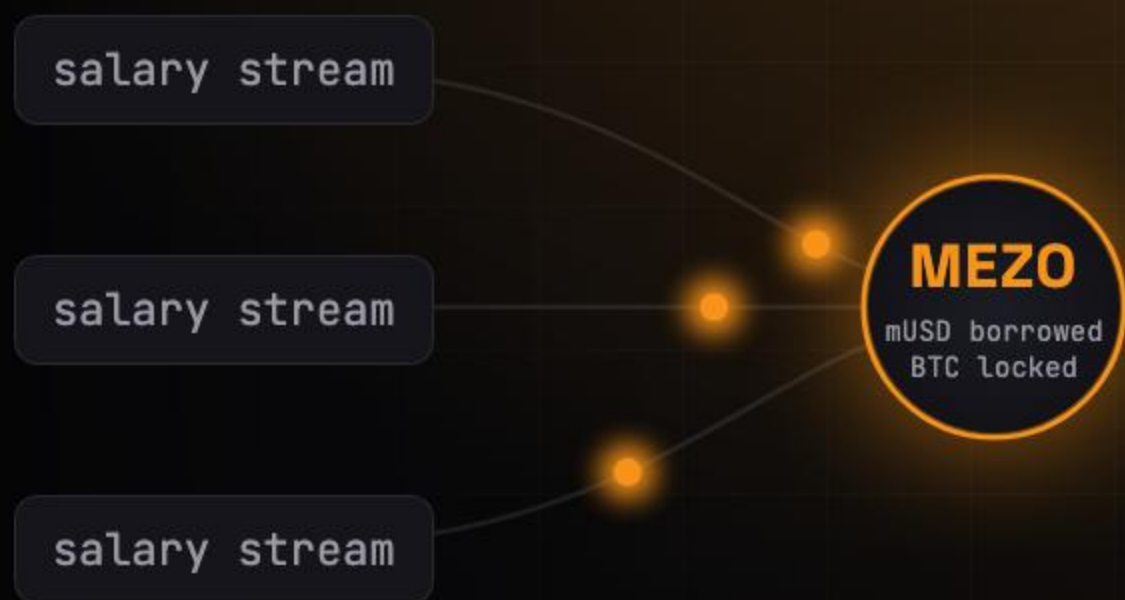

Marsella

Business & go-to-market

Business development, pitch &
events · BA Business Enterprise
& Events, LSPR Jakarta.

— WHY IT MATTERS

Built for Bitcoin teams. Built for Mezo.

START WITH

Bitcoin-native startups & remote crypto teams paying salaries today.

EVERY STREAM

borrowes mUSD and locks BTC as collateral — the activity Mezo is built for.

FOR MEZO

real mUSD demand, real collateral TVL, real-world utility for Bitcoin.

PAYROLL IS THE FIRST BILL EVERY COMPANY PAYS.

Pay your team without selling a satoshi.
